

The CORE Approach Cycle

Coordinating the action research was a learning experience and was less challenging than I thought it would be the best thing was that it took less than four weeks to collect data from over 400 youthand collected by youth!!".

Coordinator trained through CORE , St Lucia

Ongoing General Skills Building

Empowerment; Leadership; Advocacy; Partnership building; working with donors etc.

Training Peer CORE Investigators, Community Leaders & Ambassadors in CORE Approach

Monitoring & Evaluation

Data for decision making; tracking/monitoring; reporting and accountability; design of evaluations; documenting successes using various strategies, media, communication materials with stories, case studies etc.

Operations Research

Research Methods; Needs Assessments (data collection); Priority setting (ID needs & resources); Data Analysis; Documenting Findings

Ongoing technical support and capacity building; Regional and international expertise; Best practices (training, ToT, one-on-one support)

Programme Implementation

Programme management, coordination and administration; financial management; Key areas of HIV programming including BCC material development, toolkit development etc.

Programme Design

What is BCC? translation of findings into programme design; innovative programming (edu drama; arts; material development etc.); piloting BCC interventions etc.
